## Distribution Analysis II By Time Of Day & Month

**Insights:** Understanding revenue by time of day helps identify when a coffee shop is busiest and most profitable. Morning is fast and high volume; afternoon is slower but customers stay longer.

# Revenue Analysis By Store Location

**Insights:** Across all coffee shop locations allows you to move from individual store performance to a broader, strategic view of the business. Instead of focusing on one shop, this analysis highlights patterns, trends, and opportunities across the entire network.

# Revenue Analysis Day Name, Classification & Total Revenue

## Insights:

Weekends generate the majority of revenue due to routine customers.  
Midweek (Wed-Thurs) often shows the highest consistency.  
Saturday is usually the strongest single day.  
Sunday may drop depending on operating hours and customer habits.

# Overview Insight

The analysis of day name, day classification, and sum of revenue reveals clear patterns in how customers interact with coffee shop stores throughout the week.

Overall, weekdays generate the majority of total revenue, driven by consistent customer routines such as commuting, work breaks, and daily coffee habits. Among these, midweek days (Wednesday and Thursday) tend to perform the strongest, showing stable and high sales volumes.)
